

When modern design meets the most demanding system of doors and windows, the result is fabulous.

We present Panorama by QFORT®

An Aluminium sliding door system with an elegant and minimal design, wide visibility, and top performance. The system has such a smooth transition, that the boundary between your house and outside environment will blend into one.

Panorama by QFORT® brings natural light into your house, placing you in the front row of the spectacular outside show.

Exceptional advantages

Very thin and resistant profiles:

- ☞ Allow creating wide openings to the exterior.
- ☞ Bring optimal luminosity to the interior of your house.

Multiple locking points (up to 4):

- ☞ **Safety warranty and maximal tightness.**

Selection and combination of state-of-the-art components :

- ☞ **For optimal using comfort and a very good SOUND and THERMAL insulation.**

A product tested in order to satisfy the most demanding requirements:

- ☞ **For significant energy economy.**

PROFILE EMBEDDED IN THE GROUND

- ☞ Water gutter INTEGRATED in the ground, specially created to eliminate the risk of water infiltration.
- ☞ Profile embedded in the floor for easy passage.

Finishes and options

FOR EXTRA COMFORT...

- ☞ **Monitor your sliding systems**

Control your sliding system with a simple remote and you will enjoy absolute comfort from your couch.

- ☞ **Choose the blinds integrated in the glazing package**

For a high comfort it is possible to integrate Venetian blinds in the glazing package in order to manage light and protection against the heat.

Remote with 2 or 4 channels for motorized sashes

3 TYPES OF HANDLES

- ☞ Double handle with cylinder
- ☞ Internal handle with cylinder
- ☞ Internal handle without cylinder
- ☞ Available in 4 colours:

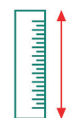

Panorama by qFORT® 7Stars

Reduced interlock of only 25mm

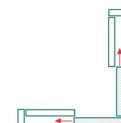

Sash height up to 3.60m

Sash width up to 3m

Pocket door up to 4 sashes

90° opening without vertical mullion

Characteristics and proven performance

Panorama 7Stars

- ☞ Thermal insulation coefficient: $U_w \geq 0.98 \text{ W/m}^2\text{K}^*$
- ☞ AWW Test (Air-Water-Wind): A*4 W*7A/9A W*C3
- ☞ Constructive schemes: up to 6 sashes on 3 rails
- ☞ Frame depth:
 - frame with 2 rails - 180mm
 - frame with 3 rails - 278mm
- ☞ Glazing package width:
 - minimum 36mm (2 glazing sheets), maximum 54mm (3 glazing sheets)
- ☞ Thickness of the external wall of the profile: Sash 2mm / Frame 1.5mm
- ☞ Interlock dimension (sash union): 25 mm

* The value $U_w = 0.98 \text{ W/m}^2\text{K}$ has been obtained for a construction with: L - 4600mm, H - 2700mm, two sashes and glazing with $U_g = 0.5 \text{ W/m}^2\text{K}$.

The range is available in the **Panorama 5Stars** as well.
Sliding systems up to 13.2m width and 3m height
